

KEYERA

KEYERA CAREER OPPORTUNITY

Facility Operator

Drayton Valley North

COMPETITION NO:	02715
POSTING EXPIRES ON:	March 22, 2019
REPORTING TO:	Plant Superintendent
ROLE DURATION:	Permanent, Full-time

THE POSITION

Keyera is currently seeking a Facility Operator to join our Pembina North Gas Plant, Bigoray Gas Plant and Cynthia Gas Plant in the Drayton Valley North area.

Suitable living area's for this location would be Drayton Valley and surrounding area. There is no camp available, however there is transportation based out of Drayton Valley area provided.

RESPONSIBILITIES

- Perform intermediate to senior level operating assignments on plant equipment.
- Work with team on preventative maintenance and ensure equipment is running efficiently and safe.
- Monitor facility readings, product sampling and quality control.
- Assist with contractor, driver orientation and supervision for on-site operations.
- Participate in review, modification or development of facility procedures.
- Support engineering and maintenance teams with various projects.

ABOUT THE FACILITIES

The facilities are located 130-170 kilometers southwest of Edmonton.

Cynthia

The Cynthia gas plant offers a full range of gas processing services including inlet compression, sour gas processing, deep-cut NGL recovery, acid gas injection and oil emulsion treating.

Bigoray

The Bigoray gas plant offers a full range of gas processing services including inlet compression, sour gas processing, deepcut NGL recovery, acid gas injection and oil emulsion treating.

Zeta Creek

The Plant is a sweet gas processing facility which offers inlet separation, inlet compression, shallow cut refrigeration and condensate stabilization.

Brazeau North & Pembina North

Brazeau North gas plant is a sweet gas processing facility with natural gas liquids (NGL) recovery. Due to its close proximity and overlapping gathering systems, the Brazeau North and Pembina North gas plants are operated as a gathering and processing complex. The pipelines between the two plants allow for the offload of gas between the facilities.
