KEYERA CAREER OPPORTUNITY

FIELD OPERATIONS ENGINEER

Drayton Valley North

COMPETITION NO:	988
POSTING EXPIRES ON:	March 29, 2019
REPORTING TO:	Manager - Asset Engineering
ROLE DURATION:	Permanent, Full-time

THE POSITION

Motivated to live in a rural setting while still working for a top employer to improve your quality of life? We have the job for you!

Keyera is looking for a Field Operations Engineer who currently lives in or are willing to relocate to the Drayton Valley area.

THE CANDIDATE

- The successful candidate may have four or more years of relevant experience from related industries such as oil and gas, pulp and paper, chemical, manufacturing etc.
- Keyera's Field Operations Engineer will thrive in a small community environment where they can make an impact on the local community.
- Strong analytical, organizational and communication skills are required as you will provide operational support to our gas and natural gas liquids (NGL) facilities.
- The right candidate will have knowledge on acts and regulations from the AER, CSA and ABSA.
- The successful candidate will have knowledge and passion for safe work practices while engaging with operations in project development implementation.
- The Field Operations Engineer has the ability to take initiative, carving out their own path while still exercising sound judgment and understanding the importance of collaboration and teamwork.
- APEGA Professional Engineer or ASET CET Designation.

ABOUT THE FACILITIES

The facilities are located 130-170 kilometers southwest of Edmonton.

Brazeau North & Pembina North

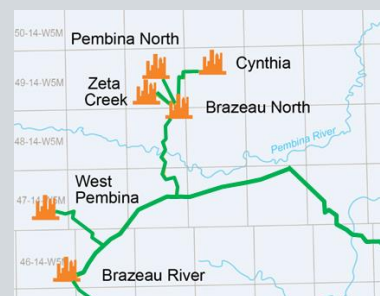

Brazeau North and Pembina North are processing facilities with natural gas liquids (NGL) recovery. Due to their close proximity and overlapping gathering systems, the Brazeau North and Pembina North gas plants are operated as a gathering and processing complex. The pipelines between the two plants allow for the offload of gas between the facilities.

Zeta Creek

The Plant is a sweet gas processing facility which offers inlet separation, inlet compression, shallow cut refrigeration and condensate stabilization.
