

KEYERA

BIGORAY GAS PLANT

*Headquartered in Calgary with operations focused in Western Canada, **KEYERA** operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.*

Our business consists of natural gas gathering and processing, natural gas liquids (NGLs) fractionation, transportation, storage and marketing, iso-octane production and sales and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

Bigoray Gas Plant

The Bigoray gas plant is located 110 kilometres southwest of the city of Edmonton. The Plant offers a full range of gas processing services including inlet compression, sour gas processing, deep-cut NGL recovery, acid gas injection and oil emulsion treating. It receives its raw gas to process from numerous wells connected by an extensive network of pipelines.

Bigoray gas plant is located in the Drayton Valley area of Alberta.

PROJECT HISTORY

1979	Constructed
