

KEYERA

## KEYERA CAREER OPPORTUNITY

### PLANT ENGINEER

Tulsa and Cushing area, Oklahoma or Houston, Texas

COMPETITION NO:	000433
POSTING EXPIRES ON:	January 24, 2019
REPORTING TO:	Team Lead, LBU Operations Engineering
ROLE DURATION:	Permanent, Full-time

### THE POSITION

Keyera is currently seeking a Plant Engineer for our growing US Operations. This exciting new role will support the day to day operations and maintenance of facilities in Oklahoma and Texas. This role is composed of the following core areas: HSE, Organization, Technical Support, Project Management and Leadership.

### RESPONSIBILITIES

- Develop and maintain strong relationships with Operations and Maintenance Teams at multiple facilities.
- Provide day to day and on-call engineering support to Operations and Maintenance.
- Conduct root cause analysis and troubleshooting analysis for operating issues and incidents.
- Provide engineering input to projects, MOCs and procedures.
- Select vendors and contractors for facility work.
- Design plant modifications or approve the designs generated by others.
- Provide support to preventative maintenance and reliability strategies.
- Research, develop and implement improvements for process optimization.
- Lead performance testing.
- Provide technical information and guidance to Business Development and Marketing.
- Use experience and knowledge to support facility training programs.
- Continuous improvement of technical skills through training.
- A technical mentor to others.
- Monitor facility performance and conduct mass balance reviews.

### ABOUT THE FACILITIES

Our newest facility will be the Wildhorse Liquids Terminal in Cushing, Oklahoma. Wildhorse will initially be pipeline connected to two existing storage terminals at Cushing. These connections will provide customers with access to the majority of the crude oil streams flowing in and out of Cushing on several major pipeline networks. Keyera's U.S. subsidiary, Keyera Energy Inc., will oversee construction of the terminal and operate it upon start-up in mid-2020.

Hull Terminal is connected via pipelines with ExxonMobil's Beaumont complex, the Daisetta storage facility and other NGL infrastructure in the area. The Terminal handles the receipt and delivery of valuable NGLs including propane, butane, iso-butane and NGL mix for delivery to and from various North American markets.

The Oklahoma Liquids Terminal is a logistics and liquids blending terminal located near Tulsa, Oklahoma. The Terminal receives, blends and delivers diluent, which is transported by pipeline from the Mont Belvieu area to the Chicago area and ultimately into the Alberta market. The Terminal also has exclusive access to a nearby rail-to-truck transloading facility.
