

KEYERA

## WAPITI GAS PLANT

*Headquartered in Calgary with operations focused in Western Canada, KEYERA operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.*

Our business consists of natural gas gathering and processing, natural gas liquids (NGLs) fractionation, transportation, storage and marketing, iso-octane production and sales and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

### Wapiti Gas Plant

Located approximately 60 kilometres southwest of Grande Prairie, the Wapiti gas plant is a sour gas processing and liquids stabilization plant supporting liquids rich Montney development in the area. The plant includes acid gas injection facilities; the most reliable and environmentally responsible method to deal with sour gas, virtually eliminating carbon emissions as compared to other acid gas handling processes.

In May 2019, Phase I of the plant commenced operations with gas processing capacity of 150 mmcf/d, and condensate handling capacity of 25,000 bbls/d. Phase II of the plant has been approved and is expected to be complete by mid-2020 adding an additional 150 mmcf/d of capacity.

<sup>1</sup> Project timing subject to construction schedule variables.

### PROJECT HISTORY

- May 2019** Phase I commenced operations
- Sept 2019** North Wapiti Pipeline System commenced operations
- Mid-2020** Phase II expected to be completed<sup>1</sup>

### PRODUCT DELIVERIES

<b>Gas</b>	TransCanada Pipeline
<b>NGLs</b>	Pembina Peace Pipeline & KAPS (2022)
<b>Condensate</b>	Pembina Peace Pipeline & KAPS (2022)
